

Instructions: Wired Bomb

Resource name	Wired Bomb
Description	This resource allows you to create a puzzle whose solution requires participants to defuse a bomb by cutting a series of wires in a specific order.
Usage requirements	None.
Settings	
Number of wires	This setting allows you to choose the number of wires the bomb will have.
Timer	This setting allows you to specify whether the bomb will display a countdown. If it is enabled, the time participants have to complete the escape room will be shown in real time.
Background	This setting allows you to change the default background of the bomb. You can enter the URL of any image from your resource catalog.
Solution	<p>You must link this resource to an escape room puzzle and specify a solution for that puzzle using the following format:</p> $W_1; W_2; \dots; W_N$ <p>Let W_i be the number of the wire that must be cut in the i-th position to solve the puzzle. The wires are numbered from top to bottom, so that the topmost wire is number 1.</p> <p>For example, if you want participants to cut the fifth wire first, then the third wire, and finally the first wire in order to solve the puzzle, the following solution must be specified:</p> <p style="text-align: right;">5;3;1</p>
