

Instructions: Basic Text Box

Enter the solution

Send

Resource name	Basic Text Box
Description	This resource allows you to create a puzzle whose solution requires participants to enter a specific text into a text input.
Usage requirements	None.
Settings	
Main text	This setting allows you to specify the text that will be displayed above the text box.
Button text	This setting allows you to specify the text of the button that submits the puzzle solution for verification.
Placeholder	This setting allows you to define text that will appear inside the text box and will automatically disappear when participants begin typing.
Width	This setting allows you to specify the width, in %, of the text box container.
Horizontal alignment	This setting allows you to center the content horizontally or align it to the left or right.
Vertical alignment	This setting allows you to center the content vertically or align it to the top or bottom.
Text size	This setting allows you to specify the text size. This size will automatically adapt to the screen. You can define a minimum and maximum text size using the following settings.
Minimum text size	This setting allows you to specify the minimum text size in pixels.
Maximum text size	This setting allows you to specify the maximum text size in pixels.

Text color	This setting allows you to specify the color of the main text, the text inside the box, and the button text.
Success message color	This setting allows you to specify the color of the success message text, that is, the text displayed when participants solve the puzzle.
Failure message color	This setting allows you to specify the color of the failure message text, that is, the text that will be displayed whenever participants enter an incorrect solution to the puzzle.
Opacity	This setting allows you to specify, in %, the opacity of the text box container.
Minimum success message duration	This setting allows you to specify, in seconds, the minimum time the success message must be displayed before the interface is updated.
Background	This setting allows you to change the default background of the resource. You can enter the URL of any image from your resource catalog.
Solution	You must link this resource to an escape room puzzle and specify a solution for that puzzle. The solution does not need to follow any specific format, it can be any text string. In addition, you may use any of the verification approaches offered by the platform. If you choose the 'Exact' verification, participants will solve the linked puzzle when they enter text in the text box that matches the puzzle's solution exactly and press the button.
Success and failure messages	You can customize the success and failure messages shown to participants from the escape room's puzzles section by editing the 'Message on success' and 'Message on failure' fields of the linked puzzle.
