

# Instructions: Jigsaw

<b>Resource name</b>	Jigsaw
<b>Description</b>	This resource allows you to create an escape room puzzle whose solution requires participants to complete a jigsaw puzzle by placing each fragment of a given image in its correct position.
<b>Usage requirements</b>	None.
<b>Settings</b>	
<b>Skin</b>	This setting allows you to select the appearance of the jigsaw puzzle. It can take the following values: "Standard" or "Framed".
<b>Solution image</b>	In this setting, you must specify the URL of the image that participants must reassemble in the jigsaw to solve the escape room puzzle. You can enter the URL of any image from your resource catalog.
<b>Reverse side of the solution image</b>	In this setting, you can specify the URL of an image to be used as the back of the solution image. If you do so, all pieces of the solution image will have a back side and can be flipped. You can enter the URL of any image from your resource catalog.
<b>Width</b>	This setting allows you to specify the number of columns into which each image will be divided. It determines the number of pieces in each row of each image. Each image will have a total number of pieces equal to width × height.
<b>Height</b>	This setting allows you to specify the number of rows into which each image will be divided. It determines the number of pieces in each column of each image. Each image will have a total number of pieces equal to width × height.
<b>Background</b>	This setting allows you to change the default background of the resource. You can enter the URL of any image from your resource catalog.
<b>Solution</b>	You can link this resource to an escape room puzzle and specify the URL of the solution image as the solution for that puzzle. If you do so, participants will be able to solve the puzzle by completing the jigsaw.
