

Instructions: Conversation

Resource name	Conversation				
Description	This resource allows you to create a puzzle whose solution requires participants to enter a specific sequence of answers to a series of questions				
Usage requirements	None.				
Settings					
Skin	This setting allows you to select the appearance of the keypad. It can take the following values: "Standard", "Retro", or "Futuristic".				
Action after solving	This setting allows you to select the action that will be carried out after the puzzle is solved. It can take the following values: <table border="1"> <tr> <td>None</td><td></td></tr> <tr> <td>Show message</td><td>If this action is selected, a message will be shown to participants when they enter the correct sequence. The message can be customized using the "Message" setting.</td></tr> </table>	None		Show message	If this action is selected, a message will be shown to participants when they enter the correct sequence. The message can be customized using the "Message" setting.
None					
Show message	If this action is selected, a message will be shown to participants when they enter the correct sequence. The message can be customized using the "Message" setting.				
Background	This setting allows you to change the default background of the scene. You can enter the URL of any image from your resource catalog.				
Questions and answers					
Question	The text shown to the player at this step of the conversation. It describes what is happening or what the player is being asked.				
Image URL	Optional link to an image displayed together with the question. This can provide visual context or clues. If not specified, the background is shown				
Answers	The selectable responses available to the player. Each answer represents a choice that leads to the next step in the conversation. When clicking on  the player can add more depth to the conversation, where an answer leads to a follow-up question and answers.				
Solution	You must link this resource to an escape room puzzle and specify a solution for that puzzle. The solution must be a sequence of uppercase letters indicating the sequencing of answers that is correct. For example: ABCC
